

BlackSky Global Private Remote Sensing License: Public Summary

On February 5, 2014, the Commercial Remote Sensing Regulatory Affairs Office of the National Oceanic and Atmospheric Administration, an agency of the Department of Commerce, granted a license to BlackSky Global, LLC to operate the “BlackSky Demonstration Satellites System”, a private, commercial, space-based, remote sensing system (the “BlackSky Global Satellite System”).

The BlackSky Global Satellite System is a planned commercial Earth observation satellite system, licensed to collect images of the Earth and will operate in a circular orbit altitude between 450 km and 600 km and an inclination of 98.7°.
