

**GeoEye Solutions Inc.**  
**Private Remote Sensing System License Summary of**  
**IKONOS Block II**

On January 10, 2006, the National Environmental Satellite, Data and Information Service of the National Oceanic and Atmospheric Administration (“NOAA”), and agency of the Department of Commerce, granted a license to ORBIMAGE SI Opco Inc. d/b/a/ GeoEye to operate a private, commercial, space-based, remote sensing system named IKONOS Block II. On May 14, 2010 the IKONOS Block II license was updated to reflect the corporate name change of ORBIMAGE SI Opco Inc. to GeoEye Solutions Inc.

The license granted by NOAA permits GeoEye to operate a low earth orbit, electro-optical imaging system which is capable of collecting, for commercial distribution, panchromatic data at a spatial resolution no better than 0.5 meters and multispectral data at a spatial resolution no better than 2.0 meters. The IKONOS Block II mission control center is located in Thornton, CO and remote ground stations are located in: Fairbanks, AK; Norman OK; and Kiruna, Sweden. IKONOS Block II may orbit Earth at an altitude of 480 km at 98 degrees – sun sync.
