

Memo for Record

July 11, 2025

Subject: Updated NESDIS Five Year Product Plan (FYPP)

In an effort to reduce administrative burden, NESDIS Office of Systems Architecture and Engineering implemented a streamlined process to approve administrative changes to the NESDIS-PLN-1003.4 "NESDIS Five Year Product Plan (FYPP)." The document was reviewed and approved by the NESDIS SAE and Office of Common Services (OCS) Directors on behalf of the full NESDIS Configuration Control Board since this update to the document was comprised of administrative changes only.

We expect the next version of the document will contain substantive changes and require full approval of the NESDIS CCB.

Dan St. Jean

Deputy Director for Systems Architecture and Engineering (SAE)
